#### Testimonial

The Bio-Electrical Field Enhancer, BEFE is way ahead as a guide and balancing energy treatment machine. The BEFE helps people maintain homeostasis and well-being. Let me explain what happened to me when I used BEFE during a health crisis.

I retired from the US Army in September of 1999. For the last eight years of my military career I was a judge on the US Army (Disability) Physical Evaluation Board. In 1994 I was diagnosed with multiple myeloma because of the objective evidence by lab tests of four blood markers being outside the normal range, an M. spike and monoclonal gammopathy Ig protein present in my blood.

I was in denial and being a member of the elite forces of our military I was in almost perfect physical and mental condition my entire career. I did not believe the doctors and specialists who were convinced I had a serious blood disorder compromising my immune system probably caused by Agent Orange and radar exposure.

When I retired in 1999 I was treated for pneumonia. The treatment did not seem to improve my condition and I returned to the Veterans Hospital to receive a more effective treatment. The lab results demonstrated my white blood cells were almost gone and my red blood cells were cut in half. Post bone marrow biopsy we discovered my bone marrow was 95 percent filled with cancer, non-

Hodgkin's lymphoma, Grade IV, Lymphoplasmacytic lymphoma. This is a very rare form of cancer, which is presently incurable, very similar to multiple myeloma.

I was admitted to the hospital and placed in isolation for over 25 days and I received over 25 transfusions of whole blood. I was not expected to live very long. I was told to get my affairs in order. When I was discharged from the hospital I did everything the doctors asked me to do and some extra things such as a more careful diet and being listed on everybody's prayer list. I also used Bio-Electric Field Enhancer treatments that are known as BEFE treatments and electrodermal screening to measure balanced readings.

I knew immediately after each of the treatments with the BEFE machine that something positive was happening to me. I could feel my energies returning in a very positive way. I was drinking the BEFE charged water and receiving Bio-Electric Field Enhancer treatments every other day. When I received electrodermal screening I could see my energy returning to a balanced position due to BEFE Treatments. After 6 months of BEFE treatments my cancer went into remission and has been in remission ever since December of 2000. This is a very challenging and hopeful time for me; however, the doctors warn me that the cancer will most probably return.

It is my sincere belief that as I continue to use the Bio-Electric Field Enhancer treatments and remain in a balanced condition, my immune system will not be compromised and working efficiently, the cancer will never return.

Very respectfully,

Lieutenant Colonel Daniel J. Costigan
